

KEYBOARDS
AND MICE FOR
HYGIENE-SENSITIVE
AREAS

washable-keyboards.com

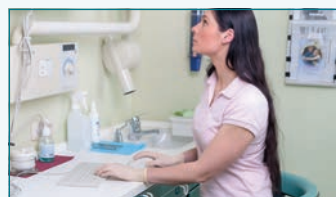

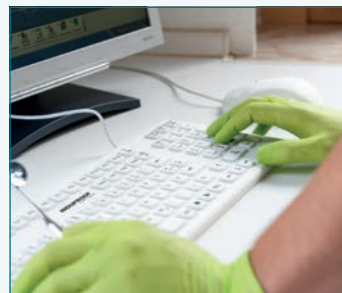

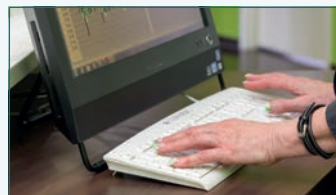

Millions of germs that can cause sicknesses are on the move directly under your fingers. As a result, your keyboard can become a real problem area!

Keyboards and mice are an ideal environment for germs and bacteria. Dirt collects at the most inaccessible points and that makes them difficult to clean. This gives rise to potential hazardous situations for hygiene-sensitive areas like food production or the health sector. But it also affects traditional PC workstations in offices. We therefore recommend that you use specially developed keyboards and mice. We can supply you with an extensive range of washable keyboards and mice to meet any requirements.

The choice ranges from a washable office keyboard to a waterproof professional keyboard for use in critical hygiene areas. In addition to the standard products that are available, we can handle your individual special wishes like printed logos or special keyboard layouts. We also develop and produce completely new data input components and devices for medical engineering applications.

WHY WASHABLE KEYBOARDS?

- To protect patients, personnel and employees from pathogens
- To improve the overall hygiene situation
- To prevent any nosocomial infections
- To guarantee that infections are kept in check in the health sector and the food processing business
- To provide cleanliness and hygiene at traditional PC workstations too
- To reduce patient treatment times and downtimes

BASIC RANGE

You can significantly improve hygiene levels at traditional PC workstations with these products!

Keyboards are an ideal environment for germs and bacteria, even in normal home and office settings. But they can quickly become a problem zone at a reception desk in doctors' practices and hotels, Internet cafes, information points, open plan offices or public buildings. Products in the BASIC range are ideally suited for use in these kinds of areas. Without forfeiting any normal ease of use, the units can be washed with water and they therefore significantly reduce germ levels.

BENEFITS

- Improved hygiene by dipping the units in cleaning solutions and/or rinsing them
- Very easy to use like a traditional PC keyboard
- Suitable for use at home or in the office
- Individual customisation like logos or specific symbols and country layouts possible

+ The opportunity for funding ¹

ADVANCED RANGE

These keyboards and mice offer protection from germs and pathogens in a hygienic environment!

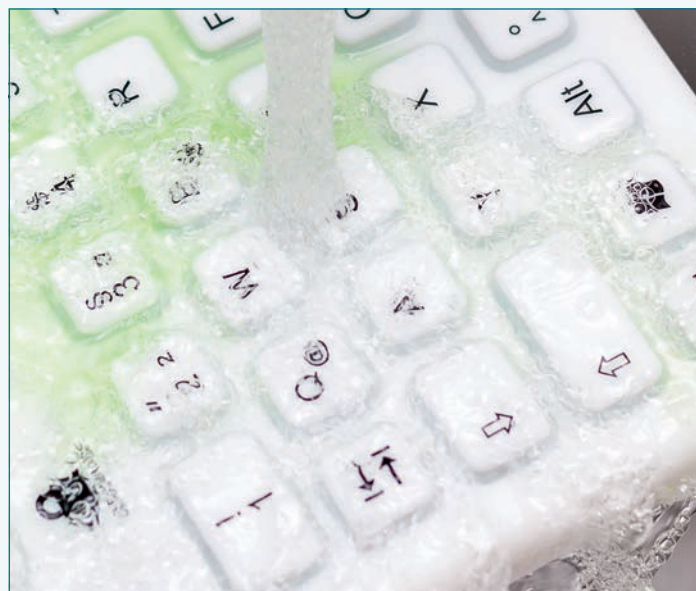

The keyboards and mice in this category are the number one choice in the health sector, the food industry and other environments with increased hygiene requirements. The units have an enclosed silicone housing that is dustproof and waterproof. As a result, you can clean and disinfect the units completely. This then totally prevents any bacteria and germs from gathering on the surface. The products are available in a wide variety of options and functions and have a long serviceable life.

BENEFITS

- Dustproof and waterproof design with a silicone surface
- Cleaning and disinfection by spraying, wiping, rinsing or dipping
- Very easy to use and long-lasting quality
- Individual customisation like logos or specific symbols and country layouts possible
- Warranties on selected models

+ The opportunity for funding ¹

PROFESSIONAL RANGE

These keyboards are the first choice in medical areas with the most stringent demands!

Hygiene-critical areas like operating theatres at hospitals or food laboratories are typical places where keyboards and mice in this range are used. It is possible to constantly and thoroughly clean and disinfect these units because of their design. The products are highly reliable and have a long serviceable life. All the technical features have been precisely developed to meet your requirements in this sector. The keyboards in this range are manufactured in Germany and meet the highest quality standards.

BENEFITS

- Dustproof and waterproof design
- Complete, thorough cleaning and disinfection by spraying, wiping, rinsing or dipping
- Models available with touch surfaces made of glass
- Top quality made in Germany
- Individual customisation like logos, specific symbols or country layouts and new developments
- Warranties on selected models
